

## MALE OR FEMALE?

*If you thought you wanted a female because you have been told that females are more loving and easier to housebreak. You have been miss-informed. Neutered males are extremely loving and are incredibly devoted to their family members . They are very easy to housebreak and will squat like a girl for the rest of their lives (unless taught to lift their leg by another dog). They will follow you every where and always want to be held in your lap and love to travel in a purse. Everyone that has had a male just loves them to pieces and does not regret their choice to have a male. In fact most that have a male and a female prefers their male. They are just the most wonderful pets and become one of the family very quickly.*

*Please do not pass these puppies by as a male puppy really can be the perfect pet.*
