

MISSION STATEMENT

Our mission, here at Teacup Angels, is to provide you with the happiest, healthiest, and best puppy possible. We hand raise all of our puppies in our home and socialize them individually each day. Our puppies are up to date on all vaccinations and wormings, and are vet checked thoroughly AND receive a negative fecal exam before they leave our home. We pride ourselves on an immaculate facility and having state of the art equipment for our puppies. We feed them an all natural and organic diet to provide them with the very best nutrition from the start. By starting the puppies this way, we can ensure that our puppies have healthier immune systems, as well as, have the best hair and skin coat possible. We hold our puppies longer than most breeders to ensure that when the puppy arrives in its new forever home, that it will not disrupt our clients lives with various issues that we feel is our responsibility to have worked out in the first place. When you receive a puppy from us, it will be eating well, have enough size, age, and maturity to be on its own. We are committed to providing outstanding customer service to our clients 24-7, in case of questions or concerns, before and after purchase of a puppy. The price on each puppy is based on size, quality, color, conformation, breed, and whether or not the puppy is Champion Sired or Champion pedigreed. We strive to achieve and maintain the strictest standards in order to provide you with a happy healthy puppy...
